

CONTINUING EDUCATION

Ludowici is a registered provider with the American Institute of Architects (AIA) Continuing Education System and the Interior Design Continuing Education Council (IDCEC). Ludowici offers four distinct courses that qualify for Health, Safety and Welfare (HSW) credits:

THE FUNDAMENTALS OF CLAY ROOF TILE (LRT-104)

1.5 Learning Units

This hour and a half program explores the benefits of using terra cotta roof tiles, including its green properties and differentiating qualities from other roofing materials. It also explores the types of terra cotta roof tiles, installation methods, accessories and other terra cotta tile applications.

THE ART OF TERRA COTTA & COLOR (LRT-109)

1.0 Learning Units

This one hour program explores the art of terra cotta, beginning with a quick overview of the manufacturing process, covering the natural variation in clay tile along with the glazing techniques to achieve the desired color. This course also focuses on the color selection and matching process to custom and historic profiles. The course provides several case studies comparing the original tiles to the new terra cotta replacements.

Ludowici Roof Tile (#J669) is an approved provider with the American Institute of Architects Continuing Education System (AIA CES).

LUDOWICI FACTORY TOUR (LRT-110)

2.0 Learning Units

When you visit the Ludowici manufacturing facility, you will get an up-close, in-depth look into the manufacturing of terra cotta tile, from the raw material grinding process to extrusion, glazing, firing and finally packaging and shipping. You'll also observe hand molding and customization techniques proprietary to Ludowici.

ARCHITECTURE & TERRA COTTA CLADDING (COMING SOON)

1.5 Learning Units

Ludowici is currently revamping the one and a half hour program detailing the science and sustainability of terra cotta wall cladding.

All of these courses are available to you for free!
